PROFILE

After graduating from College for Computer Science I joined Digidems where I worked in a fast paced environment of a political campaign. Within the Richard Ojeda campaign I headed the Cyber Security, Systems Administration, and IT sectors of the team. In school I mainly focused on software development, cyber security, and game development. You can check linkedin for tools i am familiar with, but are not listed in my resume.

LANGUAGES

- C, C++, C#, Java, Python, VB, VB.NET/C#. NET, ADA, PHP, SQL,
- Javascript, HTML, CSS
- Game development within the Unity platform for 3D and 2D games written in C#.

COLLEGE COURSEWORK

- Software Engineering
- Object-oriented Programming
- Cyber Security
- Website Design & Management
- Cloud Computing
- Windows Programming
- Programming in Python
- Basic Computer Architecture
- Data Structures

TAYLOR HOLLOWAY

Software Developer | Computer Science

EDUCATION

NORTHEASTERN STATE UNIVERSITY

2018

Bachelor of Science in Computer Science

Minor: Information Systems

Notable Achievements

GPA 3.5

Dean's Honor Roll 5 Semesters

Bachelor Thesis: Solo game creation in Unity written in C#. Then in collaboration with peer team, we built a website that promoted the game and its community.

EXPERIENCE

CYBER SECURITY AND SYSTEMS ADMINISTRATION

DIGIDEMS | COMMITTEE TO ELECT RICHARD OJEDA

2018

Digidem for the 2018 election cycle in which I was sent to increase best tech practices for the designated campaign.

Headed the Cyber Security, IT, and Systems Administration facets for the Richard Ojeda Congressional Campaign in the 3rd District of West Virginia.

Worked closely with the Digital team where we fostered a big online community outdoing our opponent 17.5 people for every 1 of theirs.

IT | HARDWARE TECHNICIAN

PCR, MUSKOGEE, OKLAHOMA

2012

Computer Maintenance - diagnosed and addressed complicated user/hardware issues with troubleshooting.

I replaced/fixed portions of desktops, laptops, tablets, and phones. Pretty much anything and everything short of soldering motherboards.

On-site computer repair while working with the clients/customers

If the problem was over the phone I would often remote into the customers PC in order to troubleshoot and fix their email, security, or settings.

PROJECTS AND INTERESTS

ONLINE COMMUNITIES

Member within Computer Science online communities on platforms such as Discord, Facebook, Skype Groups, and forums for professionals.

Active member in Unity's official discord group for game developers where other developers seek assistance, and share ideas/projects.

CYBER SECURITY

Participation in Security professionals forums and groups online. Interested in gaining more knowledge and continuing education in the Cyber Security sector.

To Whom It May Concern,

I am writing this letter of recommendation for Taylor Holloway, who was a member of my campaign for the United States Congress in West Virginia's 3rd District. During his time with us Taylor played an important role in many different facets of the campaign, including Cyber Security, Digital Media, and Systems Administration. His dependability in accomplishing what is needed at any time is matched only by his readiness to go above and beyond what is asked of him.

His Cyber Security work included supporting our Digital Director in providing a security checklist of safe ways to communicate and interact with other members of the campaign. He also utilized real-world security simulation using the email addresses of the entire campaign staff, to test those associated with the campaign and check how people would react given a real threat.

For our campaign's Digital Media, Mr. Holloway accomplished something the rest of the digital team thought couldn't be done. He created a searchable index from a giant media library of me on Facebook, speaking to the great people of West Virginia. Thanks to Taylor's tremendous work, which required an enormous amount of time and effort, my campaign staff had a ready-to-go searchable database of video transcripts from which they can easily narrow in on key issues and choose the video clips and transcripts with very little effort. No one asked Taylor to stay at the office all night to get this project done. He took that initiative and put in the extra time because he knew it would make a difference.

Finally, for every website, social media page, and software client used or developed by the campaign, Mr. Holloway had administrative access so he could manage all of the tools that we used. Anyone with that much responsibility in my campaign had to be someone I could depend upon, and someone I could trust. Moreover, on a congressional campaign where things move so quickly, our administrator also had to take care of business ASAP. Taylor Holloway demonstrated to me that he is just that person – responsible, trustworthy and capable of working in a fast-paced environment.

I am very pleased to provide this strong recommendation for Taylor Holloway. If there are any further questions regarding Taylor's abilities, work ethic, or recommendation, do not hesitate to contact me at the information provided.

Sincerely,

A handwritten signature in blue ink, appearing to read "Richard Ojeda, II", with a stylized flourish at the end.

Senator Richard Ojeda, II

To whom it may concern:

As Richard Ojeda's IT and Digital Marketing Director for his 2018 Congressional race, it was my pleasure to have Taylor Holloway on my team. He served as Richard's DigiDem and worked side by side with me everyday all the way through election day.

From day one Taylor played a critical role in ensuring our team's digital communications were kept safe from prying eyes. Taylor's vast knowledge of cyber-security best practices was critical in helping us form a solid plan. He took ownership in deploying and even auditing every single team member's security setup. His proactiveness ensured our campaign had zero security issues.

He has demonstrated impeccable problem solving skills time and time again. Without a doubt, his unique solution to a problem that I thought was unsolvable had a significant impact on our ability to reach and persuade voters. By creating a searchable database of Richard's expansive live video collection we were able to quickly find and highlight issues, and create a rapid response.

Taylor also championed and pushed hard for multiple pieces of our digital program, and ensured we had not only the funding but the proper tools to implement them. He's demonstrated ownership and perseverance every day, and our campaign would not have been as successful without his continued efforts.

I have full confidence that Taylor would excel in any position that requires leadership in an ambiguous work environment. I can not thank him enough his efforts on my team.

Sincerely,

David Wertz

IT & Digital Marketing Director for the Committee to Elect Richard Ojeda, 2018
CEO of Infinity Marketing Solutions, LLC
